

6516208968.txt

It was nice when I first started using my XM radio. It was even nicer knowing that wherever I went, I could get instant updates on traffic and weather. It is an extension of the quality of service provided by XM. There is no valid reason to stop XM from providing this service. I pay for it, and it would be infuriating to see it cut off for no real purpose. For whatever reason this is being considered, please do not take it any further.

Thank you,  
Tyler Crawford
